Novus Gear - General Purpose Couplings

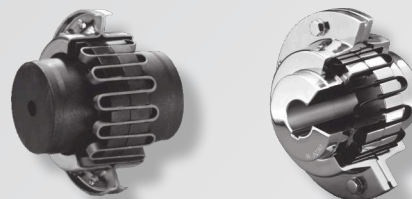

www.novusgear.co.za

Grid Coupling

An all-metal coupling that provides positive protection against the damaging effects of shock loads and vibration.

Straight Grid Resilient Couplings

Designed to provide effective shock absorption and all the movement required by the transmission industry.

Disengaging Gear Couplings

Disengaging gear couplings, custom designed to suit your application.

Crowned Gear Coupling

Crowned and barrelled gear couplings for all sizes up to 2000mm diameter for mill applications.

N-Wrap Couplings

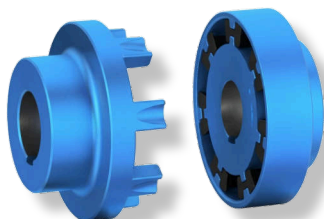

Built for quick element replacement. Hub removal or realignment of motors or drives not required.

Pin & Bush Couplings

Pin and bush couplings accept parallel, angular and axial misalignment and can provide considerable torsional flexibility.

Nu-Flex Couplings

Nu-Flex includes high graded cast iron hubs and 'H' shaped rubbers allowing for parallel, angular, axial misalignments.

Sureflex Couplings

Maintenance-free sleeves feature 4-way flexing that absorbs shock and misalignment for great performance.

Novus Gear - High Performance Flexible Couplings

www.novusgear.co.za

Euroflex API 610 and API 671 Disc Couplings /
Thomas API 610 and API 671 Disc Couplings

High performance, maintenance free disc couplings. Engineered for every application.

N-Flex Rubber in Compression Couplings

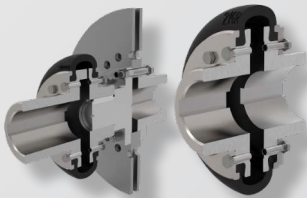

Industrial-grade Novus Gear N-Flex couplings exceptionally protect against severe shock and vibration.

Stromag Vector Couplings

Backlash-free couplings with compact, radial design for easy installation and multi-direction displacement.

Stromag Periflex

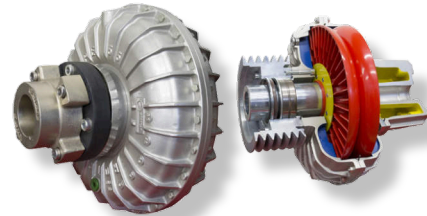

Highly flexible couplings connect electric drive shafts, absorbing extreme displacements with minimal wear.

TurboFlex Disc Couplings

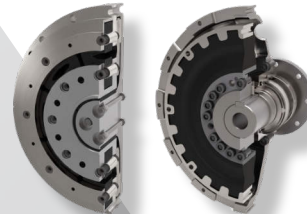

Disc couplings are specifically designed for process pump and general industrial applications.

Westcar Fluid Couplings

Fluid couplings are used in applications with high inertia at start-up, allowing the engine to start under almost no load.

Stromag Highly Flexible Couplings

Compact, highly flexible couplings connect cardan shafts to diesel flywheels, transmitting high torque.

Stromag Steel Spring Coupling

Custom-tailored Steel Spring couplings damp vibrations and shock loads to extend engine and driveline life.
